Overview

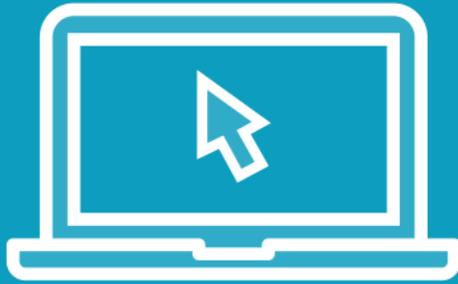

Create a Configuration Panel

- Input Field
- Slider
- Checkboxes and Toggle Buttons
- Dropdown Options

Demo

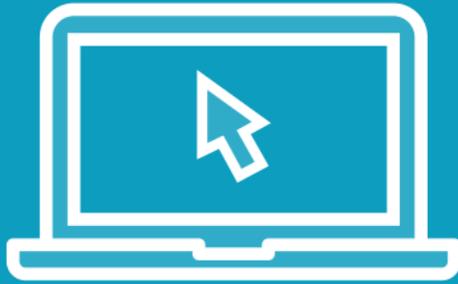

Input Fields

- Add the Input Field
- Add some text and grab it programmatically

Demo

The Volume Slider

- Add a Slider Object
- Increment it at different amounts
- Grab the value programmatically

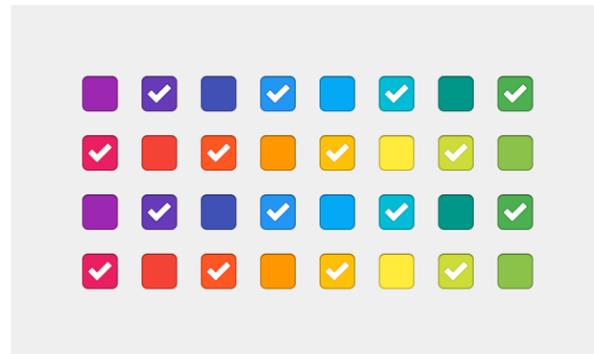

Checkboxes vs Toggle Buttons

Checkboxes

Checkboxes can be for selecting one or more options in a set.

Checkboxes have a history on web or PC.

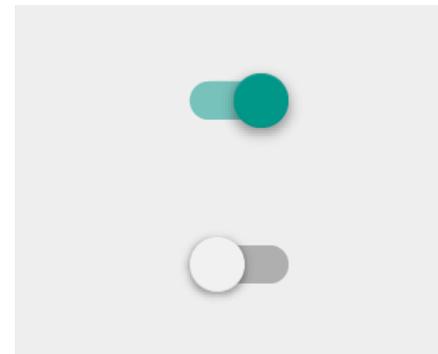

Use Checkboxes when you have a separate save Button.

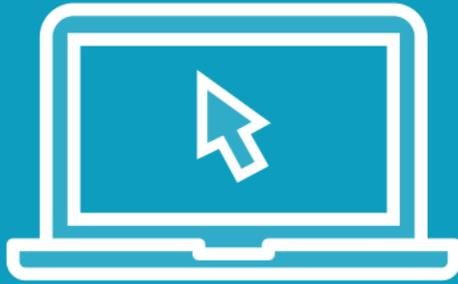

Toggle Button

Toggle buttons are standard on mobile devices to show either on or off.

Use toggle buttons when you save the value immediately.

Demo

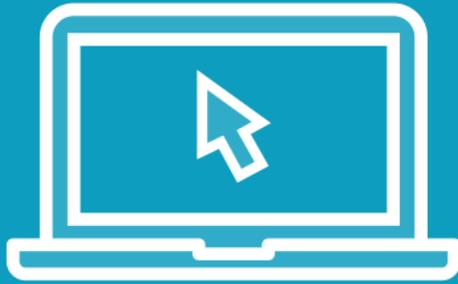

Add Checkboxes and Toggle Buttons

- Create a Checkbox
- Grab the Checkbox on/off value programmatically
- Add a “Toggle Button” which is a slider
- Change the images to look and feel like a Toggle Button
- Grab the value of the toggle button programmatically

Demo

Add Dropdown

- Create a dropdown list
- Add options programmatically
- Grab the select value programmatically

Summary

Create a Configuration Panel

- Input Field
- Slider
- Checkboxes and Toggle Buttons
- Dropdown Options
